

## REGISTRATION

We ask for your registration under the following link:

[www.uk-live.de/leipzig-school](http://www.uk-live.de/leipzig-school)

## PARTICIPANT FEES

Block C: Beyond TMMR	1.600 €
Block A: TMMR and iLNE	1.600 €
Block B: VFR + AR	1.600 €
Combined offer: A + B	3.000 €

## CERTIFICATION

The event is recognized by the Saxon State Medical Association with 28 category A points per event.

## SCIENTIFIC DIRECTION

Bahriye Aktas, M.D.; Michael Höckel, M.D., Ph.D.  
Department of Gynecology

## CONTRIBUTORS

Nadja Dornhöfer, M.D.; Benjamin Wolf, M.D.;  
Laura Weydandt, M.D.

Department of Gynecology

Ingo Bechmann, M.D.; Sabine Löffler, M.D.;  
Katja Schmidt

Institute of Anatomy

## ORGANISATION

University of Leipzig Medical Center  
Eventmanagement  
Liebigstr. 12, Building 1; 04103 Leipzig, Germany  
Phone: +49 (0)341 9726048

## LEIPZIG SCHOOL OF RADICAL PELVIC SURGERY 2024

Seminar with cadaver workshop  
and transmission from the operating  
room

March 18–20, 2024  
August 26–28, 2024  
September 2–4, 2024

## DEAR COLLEAGUES,

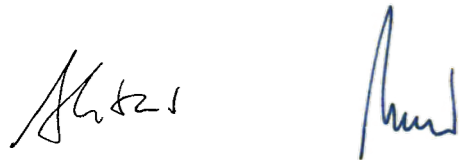

to achieve the educational goals of the Leipzig School, three times a year in spring and fall courses on the new surgical therapy of malignant disease of the lower female genital tract are held at the University of Leipzig Medical Center.

The courses are addressed to advanced gynecologic surgeons but also to colleagues who are interested in getting to know the new operations. The courses comprise lectures, anatomical workshops and live surgery in an interactive format for a small group of international participants. The limited number of attending colleagues ensures intensive learning and in-depth discussions with the faculty members.

The courses consist of 3-day blocks.  
Course language is English.

In the rare case that no patient is available for the live-demonstration of the surgical techniques of a specific course topic, a video of the operation in full length with live comments will be presented.

We are looking forward to welcoming you in Leipzig.

Bahriye Aktas, M.D. Michael Höckel, M.D., Ph.D.

## PROGRAM

### Block C: Beyond TMMR\* March 18–20, 2024, 9am–4pm

- Ontogenetic cancer field model of locoregional carcinoma spread
- Ontogenetic anatomy of the Müllerian compartment with special reference to the vagina and extracompartmental pelvic tissues
- Ontogenetic tumor and nodal staging of vaginal carcinoma
- Ontogenetic tumor and nodal staging of advanced cervicovaginal carcinoma
- Pathoanatomy of postsurgical pelvic recurrences of cervix carcinoma
- Cancer field surgery of vaginal carcinoma: surgical techniques and clinical results
- Cancer field surgery of locoregionally advanced and recurrent cervicovaginal carcinoma: EMMR, LEER & tLND – surgical techniques and clinical results

\* Cancer field surgery for vaginal carcinoma and advanced or recurrent cervix carcinoma

### Block A: TMMR and tLNE\*\* August 26–28, 2024, 9am–4pm

- Principles and practice of current surgical treatment of cervix carcinoma
- Introduction into the ontogenetic cancer field model
- Ontogenetic anatomy of the female pelvis with special consideration of the uterine cervix
- Cancer fields of cervical carcinoma, ontogenetic staging (oT)
- Pathomechanisms of lymphatic metastasis
- Cancer field model of regional tumor spread
- Development of the human lymphatic system: the abdominopelvic lymph territories in the female
- Regional metastatic pattern of cervical carcinoma, ontogenetic nodal staging (oN)
- TMMR & tLND: principles, step-by-step technique, results, comparison with conventional surgical treatment

\*\* TMMR: total mesometrial resection  
tLNE: therapeutic lymph node dissection

### Block B: VFR + AR\*\*\* September 2–4, 2024, 9am–4pm

- Principles and practice of current surgical treatment of vulvar carcinoma
- Introduction to the ontogenetic cancer field model
- Ontogenetic anatomy of the female perineum with special consideration of the vulva
- Cancer fields of vulvar carcinoma, ontogenetic staging
- Pathomechanisms of lymphatic metastasis
- Cancer field model of regional tumor spread
- Development of the human lymphatic system: the inguinopelvic lymph territories in the female
- Regional metastatic pattern of vulvar carcinoma, ontogenetic nodal staging (oN)
- VFR+AR & tLND: principles, techniques, results, comparison with conventional treatment

\*\*\* VFR: vulvar field resection  
AR: anatomical reconstruction
